

# Gleichen Call

TWENTY-FIRST YEAR NO. 26

GLEICHEN, ALBERTA, WEDNESDAY, SEPTEMBER 21, 1927

SUBSCRIPTION \$2.00 PER YEAR

## Story of Signing Blackfoot Treaty

(Continued from last issue)

The governor, on arriving at the Council House where all the chiefs were waiting him, said that he was glad to see them all there, and that he had only a few words to say to them. He said, "I expect to listen to what you have to say today, but first I would explain that it is your privilege to hunt over the prairies, and that should you desire to sell any portion of your land, or any coal or timber from off your reserves, the Government will see that you receive just and fair prices, and that you can rely on all the Queen's promises being fulfilled. Your payments will be punctually made. You all know the police; you know that no promise of theirs to you has ever been broken; they speak and act straight. You have perfect confidence in them, and by the past conduct of the police towards you, you can judge the future. I think I have now said all, and will listen to you and explain anything you wish to know; we wish to keep nothing back."

Button Chief—"The Great Spirit sent the white man across the great waters to carry out His (the Great Spirit's) ends. The Great Spirit, and not the Great Mother, gave us this land. The Great Mother sent Stamixotokon (Col. McLeod) and the police to put an end to the traffic in fire-water. I can sleep now safely. Before the arrival of the police when I laid my head down at night, every sound frightened me; my sleep was broken; now I can sleep sound and am not afraid. The Great Mother sent you to this country, and we hope she will be good to us for many years. I hope and expect to get plenty; we think we will not get so much as the Indians receive from the Americans on the other side; they get large presents of flour, sugar, tea and blankets. The Americans gave at first large bags of flour, sugar, and many blankets; the next year it was only half the quantity, and the following years it grew less and less, and now they give only a handful of flour. We want to get fifty dollars for the chiefs and thirty dollars each for all the others, men, women and children, and we want the same every year in the future. We want to be paid for all the timber that the police and whites have used since they first came to our country. If it continues to be used as it is, there will soon be no firewood left for the Indians. I hope, Great Father, that you will give us all this that we ask."

Crowfoot—"Great Father, what do you think now, what do you say to that? What I have to say will be spoken tomorrow. My brother chiefs will speak now."

Eagle Tail—"Great Father from our Great Mother, Stamixotokon and officers of the police, the advice and help I received from the police I shall never forget as long as the moon brightens the night, as long as water runs and the grass grows in the spring, and I expect to get the same from our Great Mother. I hope she will supply us with flour, tea, tobacco and cattle, seed and farming implements. I have done at present."

Old Sun—"Father and sons, I shall speak tomorrow."

Governor—"I fear Button Chief is asking too much. He has told us of the great good the police have done for him and his tribe and throughout the country by driving away the whisky traders, and now he wants us to pay the chiefs fifty dollars and others thirty dollars per head, and to pay him for the timber that has been used. Why, you Indians ought to pay us rather, for sending these traders in fire-water away and giving you security and peace, rather than we pay you for the timber used where the Indians indulged in a game

table to them. They all expect me to speak now for them, and I trust the Great Spirit will put into their breasts to be good people—into the minds of the men and women and children, and their future generations. The advice given me and my people has proved to be very good. If the police had not come to the country where would we all be now? Bad men and whiskey were killing us so fast that very few, indeed, of us would have been left today. The police have protected us as the feathers of a bird protect it from the frosts of winter. I wish them all good, and trust that all our hearts will increase in goodness from this time forward. I am satisfied. I will sign the treaty."

Button Chief—"I must say what all the people say, and I agree with what they say. I cannot make new laws. I will sign."

Red Crow—"Three years ago, when the police first came to the country I met and shook hands with Stamixotokon (Col. McLeod) at Pelly River. Since that time he made me many promises. He kept them all—not one of them was ever broken. Everything that the police have done has been good. I entirely trust Stamixotokon, and will leave everything to him. I will sign with Crowfoot."

Father of Many Children—"I have come a long way, and far behind the rest of the bands. I have travelled with these travaux that you now see outside there with my women and children. I cannot speak much now but I agree with Crowfoot, and will sign."

Old Sun—"Crowfoot speaks well. We were summoned to meet the Great Mother's Chiefs here, and we would not disappoint them; we have come and will sign the treaty. During the past Crowfoot has been called by us our Great Father. The Great Mother's Chief (Governor Laird) will now be our Great Father. Everything you say appears to me to be very good, and I hope that you will give us all we ask—cattle, money, tobacco guns and axes, and that you will not let the white man use poison on the prairies. It kills horses and buffalo as well as wolves, and it may kill men. We can ourselves kill the wolves and set traps for them. We all agree with Crowfoot."

The remainder of the day was consumed by about a dozen other chiefs speaking in favor of the treaty. Or the following day all the chiefs and councillors signed their names under

THE SHOOTING STARS

The enormous increase in the sport of deer hunting has resulted not in the vanishing of the deer but in the increase of deer. This is not as mysterious as it sounds. The more men penetrate the wilds the fewer wolves remain. The driving out of wolves has been the greatest factor in the increase of deer. But there is another factor almost as important as the wolves. The invasion of the backwoods by an army of enlightened sportsmen has demanded a much stricter and more sporting regard for game laws than was the custom some years ago. Destroyers of deer whether human or animal, have to deal with a strong and more or less organized public opinion.

Good Hunting News Reassuring news has been coming in daily to the offices of the general tourist department of the Canadian Pacific Railway Company from operators of camps, guides outfitters and others who report that all signs point to an unusually promising hunting season for the current year.

CALLING THE MOOSE

serve, south of the C.P.R. line and the surplus has crossed to the north of the tracks offering good hunting. He says that caribou are roaming the woods in increased numbers, and as the C.P.R. line is the north boundary of the game preserve hunters don't have to go very far for their quarry. The news from Sheehan's camp at Lake Penage south west of Sudbury is also music to the hunters ears. Deer here are reported to be very plentiful and sport should be excellent.

## FLORANCE PIERARD BRINGS IN THE FIRST 1927 WHEAT

Florance Pierard brought in the first load of grain of 1927 growth which was purchased by Manager R. C. Clifford of the Pioneer Grain Co. last Thursday, September 15th and graded No. 2 Northern. Mr. Pierard is one of our successful farmers north of town and does not believe in letting the grass grow under his feet but is ever a great hustler in all his work. The weather conditions of last week being far from the best and his nature being to rush things along he was the first to start threshing operations, although had he not been in such haste his grain would have undoubtedly graded better, and no doubt the major portion of his grain will be of a higher quality.

He received from the Ramsay Mercantile a present of a suit of underwear and The Call has also placed his name on the subscription list for a year's free subscription. Congratulations Mr. Pierard.

## School Fair Postponed

Owing to a case of infantile paralysis reported near Arrowood it has been decided to postpone the Gleicher School Fair. The Arrowood school is the only one closed in this district where also public gatherings have been prohibited as a precaution, although the one case is not reported to be serious.

## THE WOHELO CLUB

The Wohele's re-organized their group at the home of their leader Mrs. Hunter, on Monday, Sept. 12th. The meeting was called to order with Eugene St. Jean, former vice-president, occupying the chair.

The officers elected were: President, Olive Holland. Vice-President, Phyllis Birdson. Secretary, Edna Woods. Treasurer, Eugene St. Jean. Press Reporter, Ella Robinson. A supper was planned for the 'tear age boys and girls at the Community Hall, on Saturday, Sept. 17th. A committee was appointed of four girls to look after the "cats" from the group for that evening. The next meeting of the group will be at Mrs. McIntyre's. The meeting was adjourned after which the girls had a lunch before going home. E. Robinson, press reporter.

## Unveiling of Cairn on Thursday, Sept. 22nd

Harry Scott Asked to be Chairman—Indians Signing of Treaty to be Re-Produced in Big Teepee—Women's Institute Credited With Original Idea.

Tomorrow—Thursday, September 22nd, 1927—will be a memorable day among the Blackfoot Indians.

Just fifty years ago tomorrow, September 22nd, 1877—the Blackfoot Treaty was signed.

In Commemoration of the event tomorrow a cairn will be unveiled by Mrs. McLeod, wife of Col. McLeod, who with his gallant members of the old Canadian North West Mounted Police accomplished so much for our red brothers.

Today, Wednesday, Mrs. McLeod will arrive in Gleichen, accompanied by her son and daughter Miss Cruickshank, the noted artist, will also arrive in Gleichen today to sketch the proceedings of tomorrow. Quite justly, Mrs. McLeod will have the honor of unveiling the cairn.

Tomorrow Justice Howay, of the Supreme Court of British Columbia, and president of the Canadian Historical Society, accompanied by Hon. R. B. Bennett and others will arrive by auto from Calgary.

By special request of the Historical Society to have a local old time resident preside as chairman, Mr. Harry Scott has consented to be chairman at the proceedings which will take place promptly at three o'clock tomorrow south of Cluny near Crowfoot's last lodge. The ceremony will not last more than about one and a half hours.

Besides several short addresses the Indians will reproduce the signing of the treaty in a large teepee, erected a little below the site of Crowfoot's last lodge. The Copy given Chief Crowfoot of the Treaty will be used for this purpose and doubtless it will be a ceremony of great interest to all.

At Chief Crowfoot's last lodge there are buried beside him four of the chiefs who signed the Treaty, namely:

Horn Bull.  
Weasel Calf.  
Iron Chief.  
Running Rabbit.  
The last named was the father of the present chief, Duck Chief.

Already some Indians have arrived from other reserves to take part in the ceremony and many others are expected, and with favorable weather there is every reason to expect a big attendance of both Indians and white people.

A staff of photographers are to be on hand to take views of the entire event.

The place of the cairn is on a high hill quite close to Chief Crowfoot's last lodge and over looks the site where the treaty was signed, upon which the Women's Institutes have already marked the actual spot with a mound of stones carried there by individual members of several different Institutes, and, furthermore, it is claimed that credit is due the Institute ladies for being the first not only to act but to bring about the marking of this historical site and much thanks is extended the ladies in their efforts.

OBITUARY sincere sympathy to her in the loss of Mrs. F. K. McKay in extending home in Keswick Ridge, New Brunswick.

## The New Ford

\*Unofficial information of the new Ford Ford cars.

While descriptions of the New Ford have followed one another with bewildering rapidity, it has been difficult to obtain positive information because of changes resulting from constant experiments carried on by Ford engineers. The New Ford has, however, taken final shape, says a Dow, Jones & Co. report.

The new car is a high speed, four cylinder, selective transmission, practically all steel vehicle, with snubbers four wheel brakes and numerous other refinements. Other details are given as follows:

Isyartelf eavract-pa,as ET AOI T Engine: Larger than the L head type used in the old model "T". Both bore and stroke are increased, the former three and seven-eighths instead of three and three-quarters and the latter approximately a half inch longer. Pistons and valves will be all steel and all parts are machined and held to the closest possible limits. Tests have shown the car capable of a speed of from 55 miles to 65 miles an hour. The engine is dust proof and rated at 34 horse power as compared with the 22 h.p. rating of the Model "T".

The new engine has been worked out with aircraft principles in mind including two-blade fan in place of customary four blades, fan belt operating the fan, water pump and generator. Long life and fool proof principles were guiding principles in design. It has babbit alloy bearings with large surfaces for durability and a three bearing counter balanced crankshaft of extremely heavy construction.

The car will be equipped with snubbers and have irreversible steering gear. In appearance the new car is no longer a Ford as the term is used. A curved radiator of attractive design, Spanish type streamline bodies, improved headlights, better interior trim and more body room, are all features of the new model. It weighs a little more than the Model "T".

wick, a few weeks ago, owing to receiving word of his serious illness. The following is taken from the Fredrickton Gleaner: The death occurred on Saturday, Sept. 3rd, at Victoria Hospital of Thomas M. Jewett in his 80th year. The late Mr. Jewett was one of the best known and most highly respected citizens of York county and for the past four years had made his home with his son, Dr. M. L. Jewett, Millville. The remains were taken to his old home at Keswick Ridge, the funeral being held at the United Church of Canada at that place on Sunday at 3 p.m., Rev. Churchill Moore officiating. Interment was made at the Pickard cemetery. The funeral was one of the largest at that place for years. There survive the deceased six children, Mrs. Frank McKay, Gleichen; Mrs. A. Gordon and Arthur S., of Keswick Ridge; Roscoe, of St. John; Alden H., of Williamstown, Vermont, and Dr. Marcus L. Jewett, Millville. One sister and one brother also survive.

WORLD HAPPENINGS  
BRIEFLY TOLD

Seeing New York by air is cheaper than by taxi. The same route covered by an airplane at a cost of \$5 will run up a taxi bill of \$6.10.

Wayne B. Wheeler, general counsel of the anti-saloon league of America, died at Battle Creek sanitarium recently, due to a heart attack.

Immigration to Canada for the month of July, 1927, totalled 12,288, made up of 5,432 from the British Isles, 2,101 from the United States and 5,155 from other countries.

Ernst Vierkoetter, who won the Canadian National Exhibition marathon swim is now planning a vaudeville tour, after which he will likely enter motion pictures.

The purchase of 16 quarter sections of land, involving \$56,325, was the result of the visit of a party of land-seekers from Nebraska and Kansas to the Eston, Tyner Valley and Snipe Lake districts in Saskatchewan, recently.

Communal rioting at Nagpur, capital of the central provinces, British India, resulting in the death of 15 persons, is reported by the Bombay correspondent of The Exchange Telegraph. Many families are leaving the city, fearing renewal of the troubles.

Commander Richard E. Byrd states that he has planned to leave New York next August on his South Pole expedition and that Floyd Bennett, who accompanied him on his flight to the North Pole, would be second in command of the party.

The Aero Club Committee, after hearing Jean Callizo, French aviator, who recently claimed to have made an ascent of 13,000 metres (42,651 feet), decided unanimously not to register his record of August 28, and to disqualify Callizo for life.

M. Briand, foreign minister, acting as president of the allied conference of ambassadors, has formally notified M. Stresemann, Germany, that the allied army of occupation in the Rhineland will be reduced from 70,000 to 60,000 men. Details of the reductions will be announced later.

The death occurred at Montreal after a long illness of Samuel L. Kydd, late editor of The Montreal Gazette. Mr. Kydd joined the staff of the paper in 1874 as a compositor and before being promoted to the position of editor, filled almost every kind of office in the newspaper. He retired from the editor's post last year owing to failing health.

## Fatal Automobile

## Accidents In Canada

Over Six Hundred Persons Were Killed During 1926

The Dominion Bureau of Statistics issued a special report on deaths from automobile accidents in the nine Provinces of Canada during the year 1926. Under this title are included the accidents in which automobiles are involved in collision with other vehicles, such as horse-drawn vehicles, street cars and trains.

In the nine provinces of Canada deaths from automobile accidents totalled 606 for the year 1926, made up as follows: Prince Edward Island, 1; Nova Scotia, 28; New Brunswick, 11; Quebec, 183; Ontario, 242; Manitoba, 27; Saskatchewan, 21; Alberta, 33; and British Columbia, 60. For the whole country the death rate from this cause was 6.5 per 100,000 of population, the individual provinces giving the following rates: Prince Edward Island, 1.1; Nova Scotia, 5.2; New Brunswick, 2.7; Quebec, 7.1; Ontario, 7.7; Manitoba, 4.2; Saskatchewan, 2.6; Alberta, 5.4; and British Columbia, 10.6.

In the nine provinces 445 of the deaths due to automobile accidents, or 73 per cent. of the total, were of males; deaths of females numbered 161, or 27 per cent. of the total. Children under 15 years of age contributed 156 deaths, or 31 per cent. of the total. In this age group there were 123 male and 63 female deaths, a proportion of 66 to 34 in the mortality of the two sexes.

## Supports Bay Route

Entire support for the opening of the Hudson Bay route is given by the St. John Telegraph-Journal, one of the most influential newspapers of the Maritime provinces. "In fairness to the west," it says, "attempts to discredit the Bay route should cease. The plan is going through. It should be expedited. Let us hope that the results will fully meet the expectations of Manitoba and Saskatchewan. They have made a resolute fight for what they believed to be their due, and the rest of the country should wish them all good luck."

A fool and his father's money are easily separated.

W. N. U. 1698

## New Wireless Stations

Prospect Of Improving Communication Between England and the Dominions

In addition to the beam wireless stations between England and the United States, which are almost ready to begin operations, new stations are being built for service between England and South Africa, and between Canada and Australia. The erection of the Indian beam stations completes the contract of the Marconi Company for wireless telegraph communication for the British Government, but by no means completes the immediate prospect of improving communication between England and the Dominions. Marconi officials say the experiments have proved the possibility of carrying on a wireless telephone conversation by means of the beam station simultaneously with the operation of high speed wireless telegraph service. They declare it will be possible before the end of next year for telephone subscribers in England to call up subscribers in any of the Dominions.

## Canada's Mineral Resources

Sir Robert Horne Says Dominion Offers Great Field For Development

Sir Robert Horne, who has returned to England from Canada, where he attended the Mining and Metallurgical Congress of the British Empire, spoke with confidence of the future of the Dominion, especially in relation to her vast mineral resources. He said it was fitting that the metallurgical conference should meet in Canada because the mineral resources of Canada offered the greatest prospect of lucrative development of any in the world.

He continued: "They have only just scratched the mining areas of the Dominion up to now. There is a wave of enthusiasm for prospecting minerals in Canada which can be witnessed nowhere else."

## Make Glue From Fish Scales

Fish glue prepared from scales by natives of the Congo region in Africa, is used for waterproofing their clothes as well as canoes. Popular Mechanics magazine says. The natives prepare the glue by mixing the scales of fish with twigs of various plants and boiling the mixture. The materials to be waterproofed are then dipped in this glue, and allowed to dry.

## A New Frock For School Or Playtime

Smartly simple is this chic frock having a two-piece skirt shirred to the bodice. In View A the high neck is finished with a round collar and the long sleeves are gathered to narrow wrist-bands, while in View B contrasting material is used for the patch-pockets, overfacing on the square neck, and cuffs finishing the short sleeves. No. 1642 is in sizes 4, 6, 8 and 10 years. Size 6 requires 1 1/2 yards 36-inch, or 1 1/2 yards 54-inch material, and 1/4 yard additional 36-inch contrasting for View B. Price 20 cents the pattern.

## How To Order Patterns

"I wonder why they say 'Amen' and not 'Awomen,' Bobby.  
"Because they sing hymns and not hers, stupid."

## Goes To Argentina

W. J. JACKMAN

W. J. Jackman, of Clover Bar, Alberta, is now on his way to Buenos Ayres, Argentina, where he will make his headquarters as representative of the Canadian Wheat Pool for South America. Mr. Jackman has been on the board of directors for the Alberta Wheat Pool since the formation of that organization. He has resided in Alberta for over 22 years, coming in 1905 from the old country to farm. During his residence in Alberta he has always taken an active interest in farmers' organizations. His intimate knowledge of pool operations, his organizing and business ability and his knowledge of the Spanish language equip Mr. Jackman to be a splendid representative of the Canadian Pool in South America.

## Heat Stored Underground

Man Should Bore Holes In Earth To Obtain Heat Supply

Man should bore holes to get heat from the interior of the earth instead of destroying a highly elaborate substance like coal, the British Association of Science was told by J. L. Hodgson, mechanical engineer.

He declared that heat stored in great spheres inside the earth is at least 30,000,000 times that available in the world's coal reserve. Hot rocks are found, he said, only about 33 miles below the surface and much nearer in volcanic areas.

The speaker said he advocated drilling shafts five miles apart. Workers boring the holes would be protected by heat proof suits, including liquid air containers to supply cool dry air.

The lecturer estimated that a cubic mile of hot rock would yield as much heat as burning 200,000,000 tons of coal.

"I only wish," said the teacher, exasperated by the naughtiness of one of her small pupils, "that I could be your mother for a week."

"All right," replied the youngster, coolly, "I'll speak to father about it."

Teacher (during history lesson): "What are the races that have dominated England since the invasion of the Romans?"

Small Boy: "The Derby and the Grand National, mss."

Diamonds can be identified by means of ultra-violet rays, under which the stones give off various colors which can be photographed.

"Oh, George, I've been stung by a bee. What shall I do?"

"Put some ammonia on it."

"But it has flown away."—Tit-Bits.

## BRITISH SCHOOL BOYS VISIT CANADA

A party of British public school boys arrived in Canada on Saturday on the White Star liner Albertic to make a tour of Montreal, Ottawa, Toronto, Algonquin Park and New York, to become better acquainted with Canadian boys and to understand the points of view of other nations by means of personal friendship. They are in charge of Rev. E. S. Fellowes-Farrow, M.A., F.R.G.S., of Cambridge University, third from the left in the front row, and Rev. Howard J. Rose, M.A., of Oxford University, on the extreme right

## Supplies Germs For Experimental Purpose

Work At Lister Institute In London Is Interesting

There is always a steady demand, from laboratories and hospitals in all parts of the world, for germs—germs of every known description and variety, for experimental purposes.

Because of this, there is maintained at the Lister Institute, London, what is known as the National Collection of Type Cultures. Here a large and expert staff is kept busy feeding, raising and bottling bacteria.

When I called there recently—writes a London journalist in Pearson's Weekly—I found everyone bent intently over his delicate work. In cabinets along the walls were drawers upon drawers of tubes, all carefully tabbed and labelled, and sealed with wads of cotton wool.

The desks were fitted with Bunsen burners, stills, incubators and much other complicated apparatus, while in the centre, directing operations, stood the curator, Dr. R. St. John-Brooks.

Gradually, I was assailed by an uncanny feeling, as I realized that I was literally surrounded by millions of deadliest germs. And, a little later, I felt positively uneasy when Dr. Brooks held a tube under my nose and murmured nonchalantly: "Plague!"

Despite the coolness with which the experts handle the tubes of germs, however, they are by no means immune from infection; and I heard there is hardly a member of the staff who at some time or other has not had a serious bout of illness as a result of his fine work.

Some of the bacteria are "cranky" boarders, and for their special convenience a remarkable sort of kitchen is maintained.

The food is slightly different in many cases, and it is necessary to suit particular tastes. There is one variety of germ which is partial to nothing but beef tea, while toppers in the assembly turn part of their food into alcohol.

One sort lives in curdled milk, another ate the temperature of our blood—lest it should catch cold and die!—while others cannot stand the air.

When, therefore, you remember that here are kept well over two thousand different sorts of bacteria, you can understand the vast amount of study and work that is involved. New varieties are continually being discovered and sent from all parts of the world to be added to the collection.

Not only are the organisms associated with diseases kept in stock, however. There are also tubes containing the little chaps carefully preserved from cheese, yeast and beer.

Other varieties associated with veterinary complaints are there too, beside those responsible for the damage to plant life. The collection is therefore at the disposal of students in widely varied spheres.

All the different strains are carefully listed in a catalogue; and millions of germs may be bought for a shilling! But it is necessary to explain to the buyer just what "medium" the organism is preserved in, and because of this a careful labelling system is used. Even the color of the cotton wool plugs has a certain significance.

## Texas Has Rubber Tree

The only rubber tree in Texas is said to have been discovered on premises in Orange. The owner started to cut it down, but observed that it was of unusual type, and as a result some inquiries were made among the neighbors, who recalled the fact that a late owner of the place set out the rubber tree plant many years ago. The tree at the present time is a foot in diameter and in a thriving condition.

## Guns Replace Wedding Bells

The bang of many guns which took the place of the conventional wedding bells when Miss Viola Hamilton of Oshawa and Bert M. Robinson of Edmonton were married recently in front of the Banff Gun Club House.

The happy couple had planned to be married in the evening but enthusiastic marksmen attending the Alberta Trap Shooting championships refused to be denied and fired volley after volley in honor of the couple who drove immediately to the Banff Springs Hotel for their honeymoon. The ceremony took place on the very spot where the groom had just finished a run of 25 straight targets.

## Explosion Of Sun Would Shivel Earth

And Would Destroy Life In Few Minutes Says Eminent Professor

An explosion of the sun, similar to that which occurred recently on the star Nova Aquilla of 1927, as it is designated, would bring death and destruction to the earth, according to Professor E. B. Frost, of Yerkes Observatory.

The expansion, or explosion of the star, similar in type to the sun, was announced recently by Dr. Max Wolff of Heidelberg University, and was confirmed by photographs taken at Harvard University.

"These actions," Professor Frost said, are believed to be due to sudden trigger-like release of inter-atomic energy, due very likely to the unbelievable heat of the sun's interiors. Temperatures inside the stars vary from 500,000,000 to 100,000,000 degrees Fahrenheit.

Illustrating energy contained in atoms and what could be accomplished if it could be released and utilized, the professor said that a glass of water contained enough energy to send the Mauretania across the Atlantic ocean and back again; or it would send all the automobiles in the country from Chicago to New York and return.

"This energy, suddenly released, drives from the stars the scorching gaseous shells which reach the planets in the wake of scorching heat. The stars are not destroyed by the explosions, the nucleus remains and in time acquires another gaseous shell," the professor said.

"The heat from an explosion of the sun would reach the earth in about eight minutes and would be followed by the deadly gases in 138 hours. Should the explosion be 1,000 times the sun's present size, the heat would make life on the earth impossible anywhere but at the Poles, and not long there. Should the explosion be 30,000 times its size as was Nova Aquilla of 1918, destruction of life would be but a matter of a few minutes over the entire earth, which would be shivered."

## Might Have Two Meanings

They had been married just five years, and, as was her usual custom, the wife had made her husband a cake.

"George dear," she said, "this is our fifth anniversary, and I've baked a fruit-cake for tea."

Her husband put down his paper and took off his spectacles. It was easy to see that he was preparing to make a speech. He cleared his throat.

"How thoughtful of you, my dear!" he replied. "I have always looked back on the previous cakes as milestones in our life."

## Wool From Pine Needles

Wool is being made from pine needles by a process recently perfected in Germany. In addition to yielding strong fibres, the resin extracted from the needles is valuable in the manufacture of illuminating gas.

A large portion of our standing army does a stunt on the street cars and buses during the rush hours.

Dyspepsia is the parent of many disagreeable qualities.

Sooner or later the crooked man will find himself in straits.

## Missing Aviators

Heavy Toll Of Life In Attempts To Span the Ocean

The 62-year-old Princess Anne Lowenstein-Wertheim is the second woman to disappear in an attempted transoceanic flight within a space of a little over two weeks. The first was Miss Mildred Doran, passenger in one of the planes participating in the Dole prize race from Oakland, Calif., to Hawaii.

A list of those fliers, other than the princess' companions, Captain Leslie Hamilton and Col. F. F. Minchin, who have disappeared at sea during the present flying season, follows: Capt. Charles Nungesser and Capt. Francis Coli left Le Bourget, May 8, for New York, in a flight for the Orteig prize, subsequently won by Col. Charles A. Lindbergh.

Capt. Saint-Roman and Commander Mounieyres left St. Louis, Senegal, May 5, for Pernambuco on a flight from France to Buenos Aires.

John A. Pedlar, of Flint, Mich., Lieut. V. R. Knope, navigator, and Miss Mildred Doran, Michigan school teacher, in the plane, Miss Doran, left Oakland, Aug. 16, for Hawaii in the Dole prize flight.

Jack Frost, of New York, and Gordon Scott, of Santa Monica, navigator, left Oakland, Aug. 16, for Hawaii in the Dole prize flight.

William P. Erwin, of Dallas, Texas, and Alvin H. Elchwaldt, left Oakland, Aug. 18, in search of missing competitors in Dole flight.

In addition a number of lives have been lost in preparations for or the actual starts of attempted transoceanic flights, notably Rene Fonck's disastrous take-off for France from Roosevelt Field, Long Island, and the start of the Dole aerial derby.

## Invade Railroad Field

Number Of Women Employees Is Rapidly Increasing

The rapid advance that women have made numerically into railroad-ing during the past seven years is signalled in figures published in the Illinois Central Magazine. It reports that in the period under review the number of women employed on Class 1 steam railroads has increased more than 50 per cent. They now constitute one-thirtieth of the total staff. Their number in 1926 is given as 61,302.

Women were employed in almost every branch of railroad service last year, including two in train operation and 290 in shopwork, but the most numerous class was naturally that engaged in clerical and semi-clerical occupations, accounting for 51,127, the magazine reports. The next largest class in 1926 was that employed in cleaning, namely, 3,322; other large figures being "personal service" (waitresses, laundresses, etc.), 1,814, and telegraph and telephone operators, 1,427.

June Husband—"This steak tastes queer."

June Bride—"I can't understand it. I know I burned it a little, but I rubbed some vasoline on it right away."

Deaf worshippers, in a Fulham church are now supplied with ear-phones so that they can hear and join in the service by means of a microphone.

London Loidy (ending argument with her more stylish opponent, in the park)—If yer skirt was as long as yer tongue, yer wouldn't be showin' yer knees.

The mortality of pigeons has been markedly reduced as a result of the introduction of clay targets. Why not clay pedestrians?

Muscleman—"Do you have a piano-forte?"

Mr. Dumme—"Yes. Forte dollars down and ten a month."

Canadian wheat is necessary to make palatable bread; Russian or Australian flour is not satisfactory.

When misfortune reaches a man's door she walks right in without knocking.

The only two places that contain everything are the world and a drug store.

Physician: "Take a deep breath and say four."

Abie: "Three-ninety-eight."

Most men are willing to start something for the sake of an argument.

"It's the man with the smile that wins."

"Sure. That's why he smiles."

One way to keep your credit good is to pay your debts promptly.

One good excuse is better than a thousand poor ones.

## New Narcotic Gas

Brings Deep Sleep and Has No After Effects

At the last meeting of the Medical Society in Berlin, Professor Unger described his experience with the new narcotic gas technically known as E. 107. Up to the present it has been customary to use either ether or chloroform to produce unconsciousness in surgical cases. Gauss recently introduced another means, a pure gas entitled naarkylen, made of purified acetylene, but for various reasons its use has not become general.

It was not any danger connected with the use of ether or chloroform that induced the attempt to produce E. 107, but the discomfort connected with their use. Many sick people are unpleasantly affected by ether or chloroform; the feel of the mask, the choking sensation, the knowledge that they are being put to sleep by force, combine to make them nervous. On awakening they are plagued with thirst.

E. 107 does not have to be breathed in. It is applied by means of a syringe and works from the intestines. In eight to fifteen minutes the patient falls into a natural sleep, lasting for several hours, and feels no after effects on awakening. It is a sleep of unconsciousness during which no pain can be felt and muscles are relaxed. The drug has no effect upon the heart, but sometimes affects the breathing.

Other physicians related their experiences to the society. About a thousand cases of operations with E. 107 were reported, but the medical profession does not consider it possible to form a definite opinion as to the value of the drug until far more evidence had been collected. For the present the use of E. 107 therefore has been confined to a few great surgical stations for continued experiments.

## Advertising Helps Credit

Merchant Who Is Consistent Advertiser Can Usually Get Loan

There is one way by which a business man's credit is improved and that is by a policy of consistent advertising. Bank men believe in advertising for they know it pays. Their feeling, therefore, is that a merchant who is a good advertiser applies for a loan, that a reasonable amount of goods bought by him on credit is likely to be turned over quickly and promptly paid for, on account of his methods of keeping his goods constantly before the public. Discriminating buyers of every class know that they can get fresh goods from the store that advertises. The merchant who advertises seldom has shop-worn goods. And in that way advertising helps the merchant's credit not only with the banks, but with his customers. And one is just as important as the other.

## Naval Men Excluded From Active Politics

Cannot Make Any Speeches Or Serve On Committees

Naval men will be virtually excluded from active politics by a new order issued by the Admiralty.

The order forbids any naval officer or man to make an address to electors or in any manner allow himself to become a candidate for Parliament. This prohibition applies also to the Parliament of Northern Ireland, the Free State and the Malta Parliament, and forbids speaking or appearing on the platform at political meetings or serving on election committees.

It is provided that naval officers must seek permission from naval authorities if they wish to enter the political field.

Sam—"Yes, sar. You got the gentlest, best-natured man fo' a husband, Liza."

Liza—"Go wan. They's only one way to call it—laziness."

Wife—John, dear, when I go to Palm Beach I shall dream of you every night.

Hub—I'd rather you stayed here and dreamed of Palm Beach.

Wyoming is attempting to round up the thousands of wild horses in the state.

Thilly: "Don't you dare swear before me."

Billy: "Pardon me, go ahead."

A woman runs almost as fast when she sees a mouse as a man does when he hears a baby crying.

The quantity of meat consumed in Great Britain last year was 1,000 tons per week greater than in 1925.

The more lawn some people have to mow the more they borrow the mower.

## PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1925

## CHAPTER VII.—Continued

The magistrate proceeded to give judgment. "Stand up," he commanded again.

Helm stood.

"You see — she understands — I thought she did."

Addressing Helm he said, "You could have cleared yourself perhaps of one charge, but not of the other. So I have no option but to send you to jail. You shall be confined for three months at Stony Mountain."

Miss Rodgers was on her feet. "I appeal the case," she said.

The court room began to empty. Only the regulars held their seats. The transients were going. Some of the women would go back to attack the dishes they left in the sink; others went to inspect the shop windows; two of them strolled leisurely down to the White Lunch to have a cup of coffee and a piece of pie. It was near lunch time, and as Mrs. Morrin remarked to her friend Mrs. Edgar, "When a woman has only herself to cook for, she never cares when or what she eats."

They discussed the case as they sat at the marble topped table.

"That girl was innocent," said Mrs. Morrin, "but foolish. I'll bet she's shielding a man."

"Oh, I don't know," remarked her friend; "I remember when I was her age I had an awful crush on a woman about ten years older than I was. I forget her name now, but she was my goddess for the time. There was something fine in that girl's face — something noble. It seems a pity to send her to jail, where she will have to see and hear everything that's vile and ugly. The whole thing is rotten."

"Well," said the other one, "why don't we try to do something?"

"What's the use?" Mrs. Edgar was breaking her plea with her fork. "Women never hold together. That's why people like Magistrate Windsor can insult the women's organizations and get away with it. The women's clubs are trying to make things better, and they get blamed for what goes wrong. You and I do nothing and therefore are never blamed for anything. Great system!"

"Well, some of the women in the clubs are funny," said Mrs. Morrin. "I saw one of them the other day getting her money out of a pocket in her petticoat. She's one of their big spouters, too. Why don't they keep up with the times, visit beauty parlors and learn the use of cutex?"

The other woman considered a moment. "Still, there's nothing criminal in keeping money in the pocket of your petticoat," she said, "when you come to think of it. She was lucky

## OPERATION LEFT HER VERY WEAK

Letter Tells of Wonderful Relief After Taking Lydia E. Pinkham's Vegetable Compound

Coniston, Ontario.—"After a severe operation and a three weeks' stay in a hospital I returned home so weak that I was unable to move a chair. For four months I was almost frantic with pains and suffering until I thought sure there could not be any help for me. I had very severe pains in my left side and suffered agony every month. One day when I was not able to get up my mother begged me to try your medicine. My husband got me a bottle of Vegetable Compound at once and I took it. I started a second bottle, and to my surprise and joy the pains in my side left me completely and I am able to do all my work without help. I am a farmer's wife, so you see I can't be idle long. In all, I have taken six bottles of Lydia E. Pinkham's Compound Tablets, two bottles of Lydia E. Pinkham's Blood Medicine, and have also used the Sarsaparilla Wash."—Mrs. L. LAJUNESSE, Box 103, Coniston, Ontario.

LAJUNESSE, Box 103, Coniston, Ontario.

W. N. C. 1925

Matron interrupted to ask him to retract the word "fallen." She gave the Board members positive chills by the things she said about the double standard of morals which was made by men to shield men, and went on to tell them that many of the girls were innocent young things from the country who had come to work in the city to help the family at home, and had fallen victims to men's lust and hypocrisy. The very men who led them astray, fathers of families some of them, and regarded as respectable men in society, no doubt now spoke of these girls as "fallen women."

It was most embarrassing. She hinted that there should be women on the Board and questioned the ability of men to quite understand the problems of rescue work.

Anyone can see from this what sort of woman the Matron was and why the Board dismissed her. The girls had loved her and had done their best to carry out all her wishes. They had scrubbed and washed and polished the Home until it sparkled; they had planted a garden and made flower beds; they had sewed and crocheted and embroidered; they had studied, sung, prayed, and bravely tried to live a useful happy life. The day she left the scenes were disgraced—not a girl eat a mouthful; they just sat and cried. The Board could see they had done well to get rid of her; she was having such a weakening effect on the girls.

The Board decided then and there to have a man for the head assisted by a woman of course. "There must needs be a woman," said the good old Dr. Smythe, "for appearance sake at least." So, after diligent care, Mr. and Mrs. Wymuth were found somewhere in the East where they were doing evangelistic work. Their letters of recommendation abounded in such terms as "earnest co-operation," "moral worthiness," "deep sincerity," "unfailing devotion," "passion for souls," etc. The Board was pleased with their joint and several appearance.

(To Be Continued.)

## Scientists Still Puzzled

So Far Have Failed To Find Origin Of Strong Rays

Before an audience that packed the lecture hall, at Leeds, England, Professor R. A. Millikan of the University of California, described his late studies of cosmic rays. Professor Cocke, Swiss physicist; Hess, Austrian, and Koehler, German, independently sent up measuring instruments in balloons to determine whether rays came from the earth or the stars. Millikan took up the work in 1923 and measured rays on Pike's Peak and in balloons at a height of ten miles. The higher the instrument rose the more powerful the rays became. No doubt was left of the rays' celestial origin by Millikan's experiments of 1925, which attracted world-wide attention.

Millikan now reports the results of studies he and Dr. Cameron made in Bolivia last summer at altitudes of 15,400 feet and in Arrowhead Lake, California, with a new apparatus eight times more sensitive than heretofore used. The new findings are even more striking than the old. So powerful are these strange rays, they easily penetrate a hundred and twenty feet of water, equivalent to eleven feet of lead, and lead, he remembered, is metal used by X-ray operators to protect themselves against injury.

Whence do the rays come? Millikan cannot answer. An entirely new field for physicist is opened. The rays that come from some undetermined point in space and are more powerful and penetrating than any man can produce must have some effect on the human body and more influence on human life and happiness.

## Offer Is Accepted

Following the announcement made by Sir Arthur Keith that the British Association for the Advancement of Science intended to acquire the home of Charles Darwin, at Bromley, Kent, Dr. Buckton Brown telegraphed offering to buy the home for the nation. The association has accepted the offer.

The discovery that the fiber of the cocoon spun by the silkworm could be made into cloth is ascribed to Se-Ling-She, a Chinese queen who lived about forty-seven centuries ago.

City Visitor—Why do boys leave the farm?

Discouraged Farmer—Because they can't race trains to a crossin' g with a mowing machine, I reckon.

Men fuss so much at the foibles of women because women are the only creatures man expects to be perfect.

Animals don't talk, which indicates that they think. If you'd stop to think you wouldn't talk so much.

## Churchill and Nelson

West Coast Of Hudson Bay Possesses Only Two Large Harbors

In view of the rush of construction to complete the Hudson Bay Railway to tidewater and decision as to terminal facilities, the following remarks dealing with conditions on the coast affected, as taken from a report published by the Natural Resources Intelligence Service, Department of the Interior, Ottawa, on the resources of the Hudson Bay Railway Belt and Hudson Bay, may be of interest.

"The only harbour facilities on the west coast of Hudson Bay suitable for railway terminals are the natural facilities of Churchill and the partially constructed harbour at Fort Nelson.

"Churchill harbour is completely landlocked by rocky points and consists of a relatively small lagoon 30-40 feet deep with  $\frac{1}{2}$  square mile in which ocean going vessels can anchor and with a bottom of hardpan filled with boulders. The channel well indicated and with a depth of 60 to 100 feet at the harbours' entrance. The current is 5-6 miles per hour at ebb tide and the tide is uniformly 11-12 feet at its maximum, the harbour being approachable at all its stages, but is closed by ice covering 7 months of the year, from November 18th to June 19th on an average. The river freezes about a month earlier. There is good anchorage and a vessel of 250 foot draught can approach within 150 feet of the east side of the harbour. Dockage could be easily added.

"The roadstead of the Nelson River has been partially converted into an artificial harbour by the engineers of the railway. It is a V-shaped estuary with a long and twisting approach 1,200-3,000 feet wide, 17-20 feet deep at low water and 20 miles long and with natural exposed anchorage available some distance from the post. The harbour works consist of a 17-span bridge 3,500 feet long leading from the shore to an artificial island paralleling the channel. The island is built of filled timber cribs with docks. The anchorage will be 30 feet deep at low water and 50 at high water with a width of 300 feet. Tides range between 8 and 20 feet, average spring tides being 16 feet.

"Floating ice, driven by tides and winds across the flats, will carry away buoys during August and after the 18th of October. Solid ice breaks up about June 1st. The estuary is open half of the year, and Dr. Robt. Bell of the Geological Survey reported that during the winter of 1879-80 it did not freeze across for some 40 miles above tide water. Vessels approaching the harbour get in touch by wireless and pick up their pilot 20 miles out from the inner anchorage. They can only enter the harbour at high tide and in severe weather are obliged to remain at sea.

"While Hudson Bay is not entirely frozen over during winter, ice-cover is formed for 60 to 70 miles from the shores on the east coast often constituting a bridge between the islands and the mainland, and in other parts of the bay, where the shores are flat, solid ice extends to sea for from one to five miles."

## Riel's Rifle In Vancouver Museum

According to the Vancouver "Province" days of the historic Northwest Rebellion and Louis Riel, rebel, are recalled by the addition to the Vancouver Museum of a rifle carried by that outlaw during the stirring days of 1885. A heavy repeater, one of the first manufactured, it is still in as good working order as it was when it was surrendered. It came into the possession of the late Col. T. H. Tracy and was presented to the museum by his widow.

## Teaches Glass Blowing

The University of Pennsylvania is the only large school in the United States which offers a course in glass blowing. The Professor is Frederick Wagner, one of the few glass blowers left in Pittsburg. He has four students.

Some men's natural bent seems to be patterned after a corkscrew.

A good man isn't necessarily a desirable neighbor.

Experiments of more than thirty years have proven that Aluminum is the best container for tea. Red Rose Tea is now packed only in Aluminum, and every package is guaranteed to be in perfect condition.

## Lates Idea In Novelty Revue

A Novel Idea Is Put Across At the Calgary Exhibition

American producers of theatrical revues looking for new ideas for fairs and exhibitions may profit by an original novelty recently offered at the Calgary Exhibition and Stampede. The feature of the evening program in front of the grandstand was listed as a "Grand Novelty Revue." At the first performance the audience expected to see a bevy of pretty girls on the stage when the curtain went up for the "Grand Novelty Revue." Instead they saw some of the aristocrats of the live stock world of Western Canada. Then followed a series of scenes illustrating the progress of agriculture in the Canadian West from the time of the passing of the herds of buffalo down to the present time. The pure bred stock that took part in the revue seemed to be conscious that they were expected to "do their stuff" well and they did it. The revue was staged with elaborate scenic and lighting effects and was a popular success from the start. During the week the exhibition was on the revue drew capacity audiences and throughout the week a record attendance was registered at the "dressing rooms" of the principal actors and actresses. The revue showed that the fame of Western Canada does not rest only on the fact that it is one of the world's principal wheat producing areas, but is an important producer of every kind of live stock.

## Another British Aviator Killed

Young Officer Was Fortlith Victim This Year

Fatal casualties in the Royal Air Force this year rose to forty when Pilot Officer Harold C. Kelly, twenty-three years old, died in a hospital soon after his single-seater Woodcock fighting plane had fallen at the Avon Wiltshire airfield.

Strychnine was administered to the flyer as axes and wire-cutters were used to extricate him from the wreckage of the machine, which, in getting into a tall spin at 400 feet corkscrewed three times and then crashed into a nose dive.

Kelly was still alive when lifted from the cockpit, but died shortly after his arrival at the hospital. He had been in a similar accident two years ago, both arms and one leg being broken, but he was undeterred and continued his flying exercises in view of qualifying for a flying officer's certificate. It was the fifth fatal accident associated with this airfield in six weeks.

Sores Flee Before It.—There are many who have been afflicted with sores and have driven them away with Dr. Thomas' Electric Oil. All similarly troubled should lose no time in applying this splendid remedy, as there is nothing like it to be had. It is cheap, but its power is in no way expressed by its low price.

## Would Avert Oil Famine

Scientist Discovers Process To Get More From Wells

An impecunious government scientist has developed a process which will permit nearly 100 per cent. of the oil supply to be taken from oil wells instead of 15 per cent., which is the present average.

Dr. P. G. Nutting discovered that by the simple use of washing-soda this elusive 85 per cent of hidden oil could be dissolved and extracted from the sand.

Laboratory tests were 100 per cent. perfect, but in actual field operation the results may not be so great. Oil experts say if it goes 40 per cent. it will save off for a considerable time the anticipated oil famine which is expected to develop at the end of six years.

Employment Agency Manager.—So you'd like to employ a mason. What kind do you want?

Hi—I'd like to have one of them Free Masons I've heard so much about.

The fire brigade of a European village dashed into the village inn and the chief fireman said: "Beer and sandwiches all around, please, and hustle up the order. We ain't got any too much time. We're on our way to a big fire."

Tablets found in ancient Babylon and Assyria show that banking transactions were carried on 5,000 years ago. Cheques and notes were made of clay, which were then baked.

Drives away pain—Minard's Liniment.

## Will Return War Relics

U.S. Colonel Has Large Collection Of German and Austrian Souvenirs

A man of 52, whose diffident manner and youthful face belie his age and his attainments, sailed from New York recently, en route to Hamburg, Germany. With him a small wooden box and a large packing case.

The man, who is Lieut.-Col. George Crouse Cook, R.C., U.S.A., possessor of a Conspicuous Service Cross for work during the World War, will, if asked, refer to the contents of the wooden box and the packing case as "junk," but he has cherished that junk enough to have catalogued every item of its 500 component parts.

Specifically, the small box contains such things as caps, epaulettes, citations, pay books, Iron Crosses, wound medals, etc. all belonging to German or Austrian troops who fought the Allies, and picked up by Col. Cook during his service in France. The packing case is filled with Zepellin parts, pieces of shell, helmets and larger trophies.

Col. Cook, for example, will try to find Alfred Merten, of Gotha, Saxony. For in the small wooden box is an infantry cap and a shoulder strap which were taken from Merten by the French at Blaches in Artois, July 9, 1916. Col. Cook wants to restore the cap and strap and learn Merten's version of the war.

Another item Col. Cook wants to give back is a wound decoration, a stamped medal, finished in silver, that was bestowed upon Wladislaw Jagla of the Fifth Company, 463rd Prussian Infantry, for being wounded four times at the front. Jagla was captured on September 30, '18, at Montigny.

## Little Helps For This Week

You are all the children of light and the children of the day.—1 Thess. v. 5.

If one looks upon the bright side, it is sure to be the right side. At least that's how I've found it as I've journeyed through each day. And it's queer how shadows vanish. And how easy 't is to banish. From a bright side sort of nature every doleful thing away.

—Mary D. Brine.

There are souls in the world who have the gift of finding joy everywhere, and leaving it behind them when they go. Their influence is an inevitable gladdening of the heart. They give light without meaning to shine. Their bright hearts have a great work to do for God.

—Frederick W. Faber.

The habit of looking at the best side of any event is worth far more than a thousand pounds a year.

—Samuel Johnson.

Corns are painful growths. Holloway's Corn Remover will remove them.

Auntie—"Do you ever play with bad little boys, Willie?"

Willie—"Yes, Auntie."

Auntie—"I'm surprised. Why don't you play with good little boys?"

Willie—"Their mothers won't let me."

Mother Graves' Worm Exterminator will drive worms from the system without injury to the child, because its action, while fully effective, is mild.

If, after years of toil, a man wins success some day is sure to come along and tell him how he might have won it in half the time.

Minard's Liniment relieves backache.

"It's never too late to say dye," said the red-headed girl.

"Yes, it is," said the bald-headed man.

## Mothers, Your Health Must Be Up to Par

London, Ont.—"During one of my expectant periods I was so weak and nervous I could not get around, my head ached, I felt heavy all the time and suffered with sick stomach. I was advised to take Dr. Pierce's Favorite Prescription, and after I began taking it I got along fine. It relieved me of all the bad effects, made me well and strong, my nerves were good, and I kept so well I could do all my own work and I had a fine healthy baby."

"I also find that Dr. Pierce's Pleasant Pellets keep the stomach, liver and bowels in perfect working order and never cause distress."—Mrs. James Campbell, 109 Inkerman St. (picture above). All druggists.

Send 10c to Dr. Pierce's Laboratory in Bridgeburg, Ont. If you desire a trial pkg. Favorite Prescription tablets or Pleasant Pellets.

Betty: Have you a green lipstick?

Shop Assistant: Green lipstick?

Betty: Yes, a railway guard is taking me out tonight.

## THE TONIC THAT GIVES STRENGTH

After Acute Diseases the Blood Must Be Built Up Before Recovery Is Complete

Fevers and other acute diseases like pneumonia and influenza, leave the patient weak, with thin blood and unstrung nerves. The period of convalescence is often long and trying, and years of poor health have frequently followed so brief an illness as an attack of influenza or pneumonia. Much of this sort of misery could be avoided by taking steps to build up the blood so that it can carry to the nerves and other tissues of the body the elements they need to restore their normal functional activities. To build up the blood and restore it to its rich, health-giving vigor, no other medicine can equal Dr. Williams' Pink Pills. From first to last it is their mission to improve the blood and thus restore good health and vigor.

The value of these pills in conditions described above is shown by the statement of Mrs. Rebecca O'Brien, Pembroke, Ont., who says:—"In Nov., 1923, I was stricken with pneumonia, and at the time but little hope was held out for my recovery. However, with the best of care I was able to walk about after some months. But I did not recover my strength. The doctor told me I was anemic. My appetite was poor, I grew nervous and restless, I was deathly pale and practically gave up hope of ever being strong again. However, remembering that in my girlhood I had taken Dr. Williams' Pink Pills with decided success, I decided to try them again. By the time I had used two boxes there was no doubt the pills were helping me. Continuing their use I was soon able to attend to my household duties. I continued taking the pills, however, until I had used twelve boxes, by which time I was enjoying better health than at any time in the previous ten years. In gratitude for what the pills have done for me, I give this statement in the hope that it may point the way to health to some other weak, despondent woman."

You can get these pills from any medicine dealer or by mail at 50 cts. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Men sometimes become wiser as they grow older, but they seldom become less foolish.

Proved safe by millions and prescribed by physicians for

## GLEICHEN, ALBERTA, WEDNESDAY

### INSEPARABLE

The newspaper has become an in-  
dispensable part of the community.  
It is difficult to conceive of a com-  
munity of any great proportions de-  
void of a local newspaper. Not less  
inseparable and mutually dependent  
are the newspaper and business.

It is virtually impossible to pin-  
point a business success within the last  
two decades which has been achieve-  
without the aid of newspaper ad-  
vertising. On the otherhand number-  
less failures can be traced directly to  
inadequate appropriations for news-  
paper advertising.

Under modern economic, social and  
commercial conditions a city or town  
would become an actual reproduction  
of the poetical "Deserted Village," if  
deprived of all business enterprise.  
Neither could a store exist where  
there was not some semblance of a  
community. The relation of the  
newspaper to both community and  
business is different in degree only.  
Towns, stores, newspapers and  
newspaper ads grow up together.  
Each as a whole one cannot pro-  
per and expand until all prosper and  
expand.

### ROAD SIDE MARKETING

Development of highways and the  
accompanying expansion of motor car  
traffic throughout the country has  
stimulated road side marketing to an  
unprecedented extent. It is revealed in  
figures supplied the Alberta Motor  
Association by headquarters of the  
American Automobile Association  
with which the A. M. A. is affiliated.  
This comparatively new branch of  
home business in Alberta has made  
surprising progress in the province  
during the present season. While the  
total value of produce bought direct  
from farmers by motorists of the  
United States and Canada, this year  
alone will exceed \$100,000,000 accord-  
ing to national statistics.

President Thos. F. Henry, of the A.  
A. A. estimates that roadside buying  
by motorists will become a half-bil-  
lion dollar business within a few years.  
Naturally the business growth depends  
entirely on the improvement of coun-  
try roads and the establishment of a  
fair and amply open market between city  
and country folk in this new class of  
bartering.

In some of the American states road-  
side marketing associations have been  
formed and steps taken to elimi-  
nate those who attempt to deal dis-  
honestly, trader, motorist or farmer  
and this not only has resulted in de-  
veloping the lingering belief among  
farmers that city motorists are venal,  
but has given townspeople more faith  
in the attitude of farmers in re-  
spect to quality and the price of  
farm produce. Motor association  
officials are not also at encour-  
agement of roadside marketing will  
have a beneficial effect on farm land  
values in the long run by promoting a  
better understanding between town  
and country folk.

### THINK THIS OVER

"A naturalist divided an aquarium  
with a clear glass partition. He put  
a lumpy bass in one section and min-  
nows in the other.  
"The bass struck every time a min-  
now approached the glass partition.  
After three days of fruitless lunging  
which netted him only bruises, he  
ceased his efforts and subsided on  
the food that was dropped in.  
Then the naturalist removed the  
glass partition. The minnows swam  
all around the bass, but he did not  
strike at a single one. He had been  
thoroughly well on the idea that busi-  
ness was bad.  
"Min!" Take another shot at the  
glass partition. You'll find it isn't  
there."

It was at a revival in a Southern  
church. One exuberant soul stoutly  
rejoiced the elder's exhortations.  
"You see his dis way, Eldah! Ah!  
done got a problem. Ah don't see  
how Ah's gonna get mah shirt on  
crah mah wings when Ah gets to  
Glor'y."

"Dat ain't yo problem," retorted  
the Eldah. "Yo problem is how yo  
gotta get yo shirt on crah yo horns."

Excerpts from Newspaper Law,  
printed for the benefit of any reader  
who may have mistaken ideas regard-  
ing names:  
1. A postmaster is required to  
give NOTICE BY LETTER (return-  
ing the paper does not answer the  
law), if the subscriber does not take  
the paper out of the office and state  
the reason for its not being taken.  
master responsible to the publisher  
for payment.  
2. If any person orders his paper  
discontinued he must pay all arrears,  
or the publisher may continue to send  
it until payment is made and collect  
the whole amount, whether the paper  
is taken from the office or not. There  
can be no legal discontinuance until  
payment is made.  
3. Any person who takes a paper  
from the post office, whether directed  
to his name or another, or whether he  
has subscribed or not is responsible  
for payment.  
4. If a subscriber orders his paper  
stopped at a certain time and the pub-  
lisher continues to send it, the sub-  
scriber is held to pay for it if he  
takes it out of the post office. This  
follows the sound principle that a  
man must pay for what he uses.

Contributor: "My girl said this  
piece of mine made her heart miss y  
best." Editor: "Rejected. We don't  
want anything that will interfere  
with our circulation."

The Floral Assets of the C.P.R.

Upper—Gardens and fountain at Kenna Station.  
Lower—Woodstock Station grounds.

Flowers are among the assets of the Canadian Pacific  
Railway. It is the policy of the Company to  
establish permanent flower gardens at every station  
along the long line of track stretched across the con-  
tinent.

In the very early days of the railroad the pioneers  
were too busy attending to the task of opening up new  
lands to give much attention to flowers, yet even then  
in the early days one of the C. P. R. employees pro-  
duced a few varieties of flower seeds and he even planted  
and distributed them amongst his friends at some of  
the stations with the object of starting flower gardens  
along the line. This took place over 30 years ago  
and to-day the Company spends a considerable amount  
protecting and distributing seeds and shrubs of all  
kinds to station agents along the line. The company  
maintains a floral department with headquarters at  
the Windsor Street Station in Montreal.

In carrying out this work a great number of trees,  
seeds and perennial plants are used annually. Bulb-  
able trees such as ash, elm and maple, are supplied,  
and shrubbery such as honeysuckle, lilac, hollyhock,  
elder, spruce, weigela and many other varieties to-  
gether with a long list of bed flowers. Vines are also  
supplied to cover buildings and fences surrounding  
stations. For this purpose Virginia creepers and  
Japanese ivy are considered best.  
During the past thirty years the encouraging influ-

ence of the C. P. R. gardens has materially assisted in  
the inauguration of floral societies all over the coun-  
try, many of the officials of the Company being mem-  
bers of these societies. It is pleasing to remember  
that the work in connection with the gardens is cre-  
ated directly to the credit and employees of the sta-  
tions through their enthusiasm in beautifying the stations  
this effort and much interest is aroused by the annual  
competitions on both eastern and western lines of the  
company for the finest station gardens. Extensive  
prizes are the ones that carry off the honors. Re-  
presentatives from the floral department tour the line  
each year, staking up the gardens and deciding the  
winner. Substantial money prizes are awarded each  
year.

The floral department of the Canadian Pacific is  
constantly in touch with horticultural institutions, in-  
cluding agricultural colleges and societies, so that no  
scheme is left untried to keep up to the very latest  
methods.

## "BETTER 'OLE" IS BIG WAR PICTURE

While Warner brothers' production of "The Better 'Ole," starring Syd Chaplin and directed by Charles F. Reisner, has been hailed as one of the greatest comedies ever filmed, it is also one of the big pictures of the World War.

Unlike most pictures, every bit of "The Better 'Ole," which is the picture of Bruce Bairnsfather's world famous cartoons and stage play revolving around the character of Old Bill Busby, the British Tommy, is staged in the war zone in the front line British trenches or in the French village or countryside just behind them.

"The Better 'Ole" is in no sense a

burlesque. Everything is as nearly technically correct and like the real thing over there, as real German and British soldiers who served during the war, an unlimited amount of research, a French designer and several military technical directors could make it. Nothing is far fetched or ridiculously improbable.

Reisner has simply taken the war as it was, left out as much of the tragedy as possible, and emphasized its humorous aspects. "The Better 'Ole" has thrills, suspense and menace as well as every kind of laughter. It has some of the greatest battle scenes ever made, and some of the most idyllically picturesque rural settings. It is not just a loose-knit stringing together of irrelevant gags, but logical, articulate, absorbing story told from

## COMING EVENTS

Ads under Coming Events 25c per count line, unless otherwise advertised in The Call.

Sept 22—50th Anniversary of Signing of Blackfoot Indian Treaty.

Oct. 9 to 15—Canada's Fire Prevention Week.

Dec. 20—Ladies Circle Christmas sale in Com. Hall.

## TOWN AND DISTRICT

Ideal weather at last.

The judge says he has put one over Si and is going to the Peg convention.

The mighty hunters report ducks by the million but so far no big bag have been reported.

Rev. Mr. and Mrs. Gibney left last week for a vacation in Toronto.

Dennis Ramsbottom has arrived from Vancouver on his annual tour to help out Alberta's threshing.

Preserving Fruit of High quality. Price Right. N. T. PURCELL, Gleichen. 20tf

The Call from now to Dec. 31, 1928 only \$2.

Mrs. E. H. James has been seriously ill the past week was reported better yesterday, but not so well this morning.

Local grain experts give it as their opinion that the wheat yield this year will average about 35 bushels to the acre or nearly double that of last year, which was about 20.

Mr. and Mrs. Cocks deeply mourn the loss of their baby boy, Leslie Ronald Edwin, and wish to thank the many friends for their kindness and sympathy in their great trial.

The many threshing outfits are all getting busy and by the first of next week everything will be running full blast provided enough workmen can be obtained. The pay is now \$6 a day and men very scarce at that price.

## A DELIGHTFUL BANQUET

Rev. R. W. Hibbert, M. A., B. D. of Calgary, was a visitor in town over the week end. During his stay Mr. Hibbert delivered several addresses in the interest of the Religious Educational Council of Alberta of which organization he is secretary.

On Saturday evening Mr. Hibbert was the guest of honor at a delightful banquet served in the Community Hall. Some forty teen age boys and girls, representing the C. G. I. T. the Tuxis Boys and the Trail Ranger camp were present. Seated at the table with Mr. Hibbert and the young people were Miss Young, Miss Cosh Mrs. R. Hunter, Mr. Peter Maclean superintendent of the United Church school, Mr. Thos. Bates, superintendent of St. Andrew's Church School Mr. Bachelor, student missionary of St. Andrew's, and Rev. C. R. Corcoran, minister of the United Church Gleichen.

Mr. Hibbert was the only speaker. He spoke on the "World Wide Movement of Young People," calling the special attention of those present to their own organization which he said was Canadian, it was church organized, and it was Christ centered.

On Sunday morning Rev. Mr. Hibbert visited the Church school in the United Church, and in the evening he occupied the pulpit in the same church, when a fine audience listened to a very thoughtful sermon from the text, "And he went forth conquering and to conquer."

Mr. Hibbert left Monday afternoon for his home in Calgary.

## ST. ANDREW'S CHURCH

15th Sunday after Trinity.

Sunday Sept. 25.

Sunday School at 11 a.m.

Evening service 7:30 p.m.

Mr. Hewitt, A. K. C., of Regina will again take charge of the evening service. All enjoyed Mr. Hewitt's address last Sunday evening and it is hoped there will be a good congregation next Sunday to again hear Mr. Hewitt.

The Call from now to Dec. 31, 1928 only \$2.

They gave Socrates hemlock to drink. Moonshine hadn't been invented then.

It might help some if the manufacturer would use a miniature figure of a coroner as a radiator cap ornament.

Church school at 11 a.m.

7:30 p.m. The minister will continue his series of sermons on "What is a Christian."

Arrowood:

No service.

Cluny:

Service of teaching and service.

## STORY OF SIGNING OF BLACKFOOT TREATY

(Continued from page 1.)

the signatures of the Commissioners and a salute of thirteen guns announced the final conclusion of the last treaty with the Indians of the North West.

On Sunday afternoon the Indians fought a sham battle on horseback. They wore only the breech-cloths. They fired off their rifles in all directions, and sent bullets whistling past the spectators in such close proximity as to create most unpleasant feelings. All were heartily glad when they fled past singly on the way back to their lodges, and the last of their unearthly yells had died away in the distance.

The next three days were occupied in paying off the different tribes. It was hard work to find out the correct number of each family. Many after receiving their money would return to say that they had a wrong count; one would discover that he had another wife, another two more children, and others that they had blind mothers and lame sisters. In some cases they wanted to be paid for the babies that were expected to come soon.

The chiefs presented an address to the Commissioners expressing the entire satisfaction of the whole nation with the treaty and to the way in which the terms had been carried out. They tendered their well-wishes to the Queen, the Governor, Col. MeLeod and the police force. They spoke in the most flattering and en-

thusiastic manner of the Commissioner, Assistant-Commissioner, officers and the force in general, and said it was their firm determination to abide by the laws of the Great Mother. Potts, the interpreter at Fort McLeod, said he never heard Indians speak out their minds so freely in his life before.

## That Settles the Matter —OF— What the new Ford will be like

Absolute knowledge I have none, But my aunt's washerwoman's son Heard a policeman on his beat Say to a laborer on the street, That he had a letter last week Hand written in the finest Greek From a Chinese coolie in Timbuctoo Who said that a son in Cuba knew Of a colored gent in a Texas town Who got it right from a circus clown That a man in Klondike got the news From a gang of American Jews About some fellow in Borneo Who knew a man who claimed to know A hermit who lived beside a lake Whose mother-in-law will undertake To prove that a friend's sister's niece Has stated in a nicely written piece That she has a son who knows about

## The Time the New Ford Comes Out

BUT IT WILL BE A HUMMER WHEN IT COMES OUT AND IT WILL BE MONEY IN YOUR POCKET TO WAIT UNTIL IT DOES COME OUT

IT WON'T BE LONG NOW
